NAUGRA®

Product name:	Product code:
PCB Hole Cleaning and Desmear Unit	CMI-NP-1829

Description

PCB Hole Cleaning and Desmear Unit is a unit for removing resin smear from drilled holes before metallization.

Technical specification

- Anodes
- Racks
- Chemical kit

The PCB Hole Cleaning and Desmear Unit is a unit for removing resin smear from drilled holes before metallization. It is designed for through-hole plating and chemical metallization of double sided and multilayer PCBs in a lab.

Features

- Complete small-scale hole plating process
- Heated and agitated tanks for uniform plating
- Corrosion-resistant PP or PVC construction
- Digital temperature and timer controls

Technical Specifications

Bath	Alkaline permanganate
Tank	10 L
Temp	60 - 80 deg C
Supply	230 V AC, 50 Hz, single phase
Tank material	Polypropylene
Heater	PTFE or titanium, with controller
