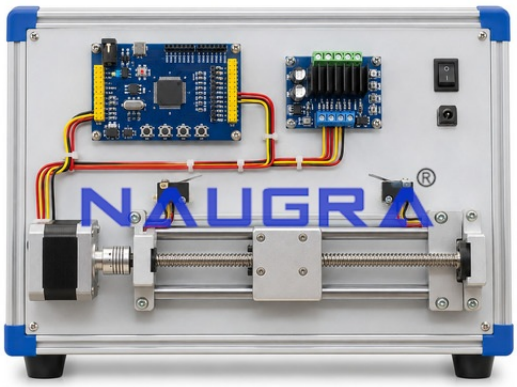
Product name:	Product code:
MCU Experiment and Motion Control Experiments	CIVIL-MCU-98-0002



Description

MCU Experiment and Motion Control Experiments

Technical specification

The MCU experiment and motion control experiment trainer adopts a modular structure. By means of this device, you can finish the following experiment content.

1. Motion direction control
2. Motion speed control
3. Positioning control
4. Movement limiting
5. Single-axis linear motion control: acceleration and deceleration
6. Principles and practical application of two-dimensional linear coordinate difference
