Product name:	Product code:
Boring machine	SEL-0009

Description

Boring machine

Technical specification

The boring machine is mainly used for reboring engine cylinders of motor cycles, automobiles and middle & small-tractors.
--- Reliable performance ,widely use, processing accuracy high productivity.
--- Easy and Flexible operation .
--- Good rigidity ,amount of cutting

Boring diameter	65 – 140 mm	80 – 165 mm
Max. boring depth	300 mm	400 mm
Spindle speed	250, 380 r/min	200, 300 r/min
Spindle feed	0.11 mm/r	0.12 mm/r
Spindle quick reset	636 mm/sec	780 mm/sec
Overall dimensions	320x330x850 mm	360x345x1100 mm
Machine weight	62 kg	85 kg
