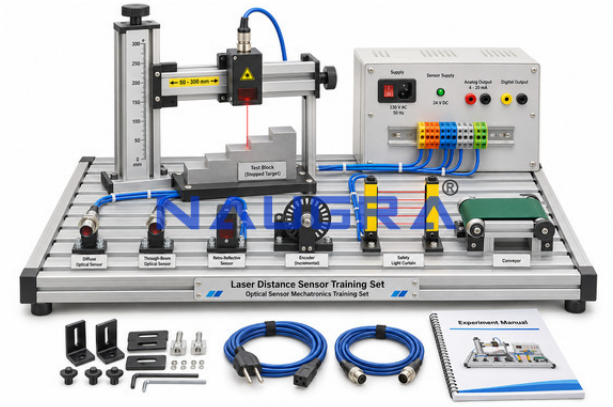
Product name:	Product code:
Laser Distance Sensor Training Set	CMI-NP-1766



Description

Laser Distance Sensor Training Set is a trainer using a laser displacement sensor for distance and thickness measurement tasks.

Technical specification

Base	Aluminium profile with T-slots

Standard Accessories

- Sensor mounting kit
- Connecting cables
- Experiment manual

The Laser Distance Sensor Training Set is a trainer using a laser displacement sensor for distance and thickness measurement tasks. It is designed for learning the installation, alignment and application of optical sensors in automated mechatronic systems.

Features

- Industrial-grade optical sensors on adjustable mounts
- PLC compatible 24 V DC PNP or NPN outputs
- Practical tasks on detection, counting and sorting
- Aluminium profile base plate with T-slots

Technical Specifications

Range	50 - 300 mm
Resolution	0.1 mm
Output	4 - 20 mA and digital
Supply	230 V AC, 50 Hz, single phase
Sensor supply	24 V DC
