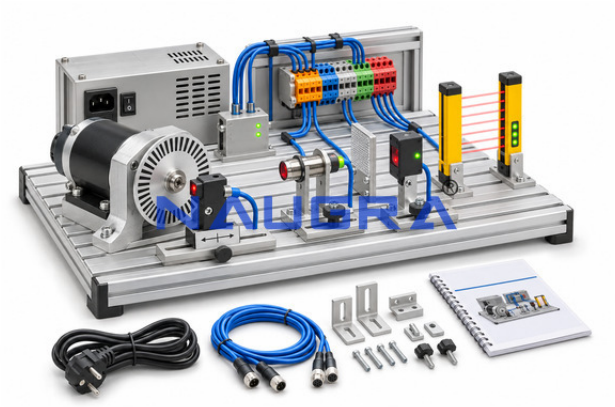
| Reflective Optical Encoder Training Set | CMI-NP-1769 |



## Description

Reflective Optical Encoder Training Set is a trainer for position and speed measurement using reflective optical encoders with a motor drive.

## Technical specification

| | |
|---|---|
| Base | Aluminium profile with T-slots |

**Standard Accessories**

- Sensor mounting kit
- Connecting cables
- Experiment manual

The Reflective Optical Encoder Training Set is a trainer for position and speed measurement using reflective optical encoders with a motor drive. It is designed for learning the installation, alignment and application of optical sensors in automated mechatronic systems.

**Features**

- Practical tasks on detection, counting and sorting
- Aluminium profile base plate with T-slots
- Includes wiring tasks with safety plugs
- Industrial-grade optical sensors on adjustable mounts

**Technical Specifications**

| | |
|---|---|
| Resolution | 1000 PPR |
| Output | A, B, Z channels |
| Motor | 24 V DC, 3000 rpm |
| Supply | 230 V AC, 50 Hz, single phase |
| Sensor supply | 24 V DC |
