| Class III Glove Box Biosafety Cabinet | CMI-NP-0014 |

## Description

A gas-tight Class III biosafety glove box with attached rubber gloves, HEPA filtered supply and exhaust, used for handling highly hazardous microorganisms in a fully enclosed workspace.

## Technical specification

| | |
|---|---|
| Power supply | 230 V AC, 50 Hz |

**Standard Accessories**

- Gloves (pair)
- Pass box

The operator works through glove ports so there is no direct contact with the material. A pass box with interlocked doors is provided for transferring samples in and out of the enclosure.
