Product name:	Product code:
Dual Block COD Digester with Cooling Fan	CMI-NP-0017

Description

A dual block COD digester with two independently controlled aluminium blocks and cooling fan, enabling digestion at different temperatures and quick cooling of vials after the run.

Technical specification

Power supply	230 V AC, 50 Hz

Standard Accessories

- Vial racks (2 nos.)

Each block holds 12 vials and can be set separately, so COD and total phosphorus digestion can proceed at the same time. A fan lowers temperature quickly so the vials can be handled sooner.

Features

- Two independent 12-vial blocks
- Separate temperature and time controls
- Built-in cooling fan
- Safety cover with thermal lock

Technical Specifications

Positions	2 x 12 vials
Temperature range	Ambient to 200 deg C
Accuracy	+/- 1 deg C
Timer	Independent for each block
Cooling	Forced air fan
Block	Aluminium
