NAUGRA®

Product name:	Product code:
Analogue Communication Circuit Trainer	CMI-NP-1884

Description

Analogue Communication Circuit Trainer is a trainer for AM and FM modulation and detection circuits.

Technical specification

- Patch cords
- Breadboard wires
- Manual

The Analogue Communication Circuit Trainer is a trainer for AM and FM modulation and detection circuits. It is designed for building and testing analogue circuits with op-amps, amplifiers, oscillators and power supplies.

Features

- Portable and easy to use
- Experiment manual with circuit diagrams
- Built-in regulated power supplies and function generator
- Breadboard area for building circuits

Technical Specifications

Carrier	1 MHz
Message	1 kHz
Modes	AM, FM
Supply	230 V AC, 50 Hz, single phase
DC outputs	+/- 12 V, +5 V
Case	ABS or powder-coated enclosure

Standard Accessories
