Product name:	Product code:
Steam Boiler Trainer With Electrical Fault	EEZ0005

Description

Steam Boiler Trainer With Electrical Fault

Technical specification

Globe valve
Makeup valve assembly
Mounting legs
Condensate pump (high pressure), turbine type
Electric motor, 1/3 Hp
Make

Blowdown Separator with:

code tank
Aftercooler assembly consisting of: ball valve strainer check valve

• Heat Exchanger, tube-in-shell type

• Strainer, Y-type

• Steam Trap, inverted bucket type

• Pressure Regulator Valve, (5–50 psig)

• Temperature Regulator Valves

• Vacuum Breakers

• Steam Traps, float and thermostatic type

• Temperature Gauges

• Pressure Gauges

• Hot Water Storage Tank, 12 gallon

• Hot Water circulating pumps

• 2-Way Valves

• Check Valves

• Sight Glass
