Product name:	Product code:
Horizontal Laminar Flow Clean Air Bench 4 Feet	CMI-NP-0026

Description

A horizontal laminar flow clean bench giving HEPA filtered air across the work area, used for sample preparation and sterile assembly where product protection is needed.

Technical specification

Power supply	230 V AC, 50 Hz

Standard Accessories

- UV lamp
- Pre-filter

Air passes through a pre-filter and HEPA filter and flows horizontally toward the operator. It is commonly used in microbiology, tissue culture and electronic assembly for particle free work space.
