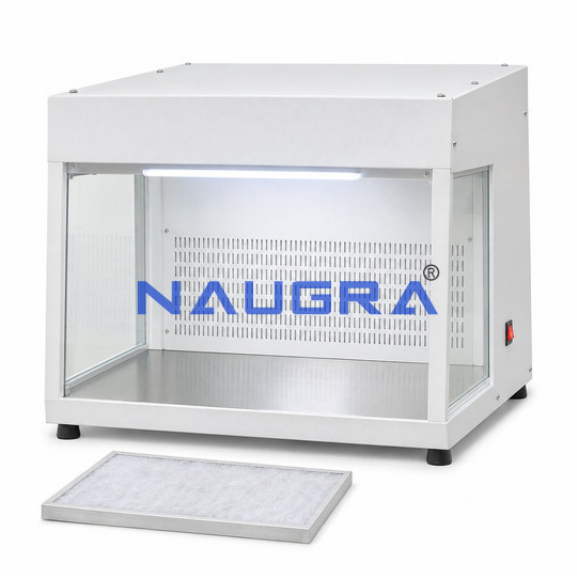
Product name:	Product code:
Portable Mini Clean Air Bench 2 Feet	CMI-NP-0028



Description

A small portable laminar clean air bench with HEPA filter, designed for sterile operations in small laboratories, dental labs and school microbiology classes.

Technical specification

Power supply	230 V AC, 50 Hz

Standard Accessories

- Spare pre-filter

This light bench stands on a table and needs only a 230 V socket. It gives a clean zone for plating, inoculation and small component handling.
