NAUGRA®

Product name:	Product code:
HPLC + Accessories	NUGBLY0123

Description

HPLC + Accessories

Technical specification

High Performance Liquid Chromatography (HPLC) Binary HPLC Pump
The 1525 has 100ul heads, optional injector, degasser, automated seal wash and is designed for isocratic or gradient applications using columns with an ID from 2- 4.6mm.
Autosampler
Waters® 2707 Autosampler is a compact, versatile module for highly precise and reproducible injections into an LC system controlled by Breeze 2. It utilizes 2 microtiter plates in 96 or 384 capacity or 48 vial and 12 vial trays are also available with or without temperature control.
In-Line Degasser 2-Channel 1500 Column Heater
Photodiode Array Detector
The Waters® 2998 Photodiode Array(PDA) Detector complements Waters analytical and preparative HPLC system solutions. Its uniquely integrated software and optics innovation deliver no compromise chromatographic and spectral sensitivity, and has a noise specification as low as 10uAU. Utilized for compound confirmation, method development, or routine analysis, the 2998 PDA is reliable and easy-to-use. Breeze 2 Software allow flexibility of either 2D or 3D operation for spectral comparison and peak tracking.
Breeze 2 Software Add-on Single System [6] [7] ACCQ-TAG 3.9X150mm Column
