Product name:	Product code:
Digital Dry Block Thermostat 96 Well	CMI-NP-0041

Description

A digital dry block thermostat for 96 well plates or microtubes from ambient to 150 deg C, used in molecular biology for incubation, enzyme reactions and sample heating.

Technical specification

Power supply	230 V AC, 50 Hz

Standard Accessories

- Interchangeable block

Interchangeable blocks let the user heat tubes of different sizes or plates. Accurate temperature control makes it a handy bench instrument in research laboratories.

Features
