

Product name:
Low Temperature Cycle Water Bath

Product code:
CIVIL-WTR-142-0005

Description

Low Temperature Cycle Water Bath

Technical specification

Microcomputer control ,quickly heating,touch panel control,easy to operate

One-timer-molding cistern,easy to clean

LCD display temperature setpoint and temperature measurements, with 0.1 ° resolution

Inside and outside pump cycle,inside circulation ensures temperature uniformity

The circulating pump can be used as a heating or constant temperature machine to test the outside of the heated liquid in the bath

with power-off protection,low water level protection and alarm

Over current protection, high temperature and low temperature alarm function, empty operated protection

with temperature runaway protection and alarm function

function of parameter memory ,temperature correction

widely used in electronic inspection, chemical reaction, high temperature distillation, semiconductor industry, etc.
