Product name:	Product code:
Digital Dissolved Oxygen Meter with Probe	CMI-NP-0056

Description

A digital dissolved oxygen meter with temperature compensation and polarographic probe for measuring oxygen levels in river water, wastewater and aquaculture tanks.

Technical specification

Power supply	230 V AC or battery

Standard Accessories

- DO probe
- Membrane kit

The meter displays oxygen in mg/L and percent saturation, with salinity and altitude correction. It is used in water laboratories and for BOD measurement.

Features

- Reading mg/L and percent saturation
- Automatic temperature compensation
- Salinity and altitude correction
- Probe with membrane and electrolyte

Technical Specifications

Range	0 to 20 mg/L, 0 to 200 percent saturation
Resolution	0.01 mg/L
Accuracy	+/- 0.2 mg/L
Temperature	0 to 50 deg C
Probe	Polarographic with cable 3 m
Display	LCD
