

Product name:
Probe PH Composite Electrode

Product code:
CIVIL-PHM-149-0004

Description

Probe PH Composite Electrode

Technical specification

Composite electrode that combined with pH glass electrode and reference electrode.

3ft cable with standard BNC (Q9-type) plug, and the quality glass bulb pH sensor has high sensibility for pH value.

The pH electrode is the part of the pH meter in contact with the measured solution, can be used to measure the potential value of the electrode.

Key element of pH meter to measure the pH of hydrogen ion aqueous solution.

Pen type pH electrode sensor BNC connector probe is widely used for pH detection in chemical industry, pharmaceutical industry and scientific research.

Product description

Specifications:

Material: PC+fiber

Measuring Range: 0~14pH

Temperature Range: 5~60?

Salt Bridge Material: fiber

Filling Liquid: Saturated kcl

Cable Length: 90cm / 35.43in

Item Size: 165 * 21mm / 6.49 * 0.83in

Item Weight: 95g / 3.35oz

Package Weight: 115g / 4.05oz
