Product name:	Product code:
Programmable Flocculator with Speed Profile	CMI-NP-0068

Description

A programmable six paddle flocculator that runs rapid mix, slow mix and settling stages automatically, used in water treatment research to reproduce plant mixing conditions.

Technical specification

Power supply	230 V AC, 50 Hz

Standard Accessories

- Beakers (6 nos.)

The controller stores several stages of speed and time, so one press runs the whole jar test cycle. It improves repeatability between tests.

Features

NAUGRA®
