Product name:	Product code:
Settling Column Apparatus for Water Treatment	CMI-NP-0069

Description

A transparent settling column set for studying sedimentation of suspended particles with sampling ports at different depths, used in environmental engineering laboratories.

Technical specification

Drain	Bottom valve

Standard Accessories

- Sampling bottles

Samples are drawn from several heights at timed intervals to plot settling curves. The test supports design of sedimentation tanks and clarifiers.

Features

- Clear acrylic column
- Sampling ports at set depths
- Graduated scale
- Stand with base

Technical Specifications

Column	150 mm dia, 2000 mm height
Material	Transparent acrylic
Ports	5 nos. at 0.3 m interval
Scale	Graduated mm
Stand	MS powder coated
Capacity	Approx. 35 litres
