Product name:	Product code:
Six Place Jar Test Apparatus with Illumination	CMI-NP-0070

Description

A six place jar tester with variable speed paddles and illuminated base for coagulation and flocculation studies in water treatment research and plant optimisation.

Technical specification

Power supply	230 V AC, 50 Hz

Standard Accessories

- Beakers (6 nos.)
- Paddles (6 nos.)

Six one-litre beakers are stirred at identical speed while chemical dosages are changed. Illumination under the base makes floc formation easy to observe.

Features
