Product name:	Product code:
Friability Tester with Dust Removal Unit	CMI-NP-0079

Description

A friability tester combined with a small tablet deduster and balance port, used to prepare tablets before and after abrasion tests with accuracy.

Technical specification

Power supply	230 V AC, 50 Hz

Standard Accessories

- Deduster mesh

Dust from tablets is brushed or blown away before weighing so weight loss is not hidden. It is used in tablet development and quality control.
