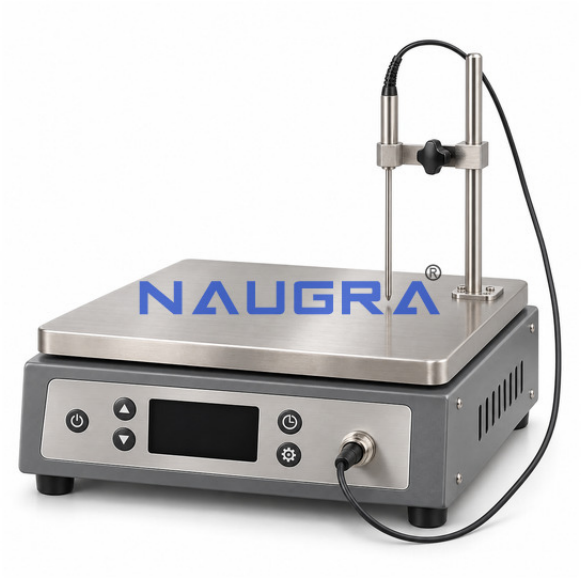
Product name:	Product code:
Hot Plate with Temperature Probe and Timer	CMI-NP-0094



Description

A rectangular hot plate with external temperature probe and timer that controls the heating of the liquid, not just the plate, for accurate reaction temperature.

Technical specification

Power supply	230 V AC, 50 Hz

Standard Accessories

- Temperature probe
- Probe holder

The probe is dipped in the beaker, and the controller keeps the liquid at the set value. The timer shuts the heat off after a set period for unattended safe use.

Features

- Digital temperature control
- Digital timer
- Over-temperature protection
- Stainless steel top

Technical Specifications

Plate size	200 x 300 mm
Temperature range	Ambient to 350 deg C
Probe accuracy	+/- 1 deg C
Timer	1 minute to 99 hours
Power	1500 W
Top	SS 304
