Product name:	Product code:
Kjeldahl Steam Distillation Unit Glass Type	CMI-NP-0110

Description

A glass steam distillation unit with round bottom flask heating mantle and condenser for traditional macro Kjeldahl nitrogen distillation in teaching laboratories.

Technical specification

Power supply	230 V AC, 50 Hz

Standard Accessories

- Glass beads
- Clamps

Ammonia from the digested sample is steam distilled and condensed into acid. This assembly is used where simpler equipment is needed for demonstration and practical classes.

Features

- Borosilicate glass assembly
- Heating mantle for steam flask
- Splash head and condenser
- Stand with clamps

Technical Specifications

Flask	1000 ml round bottom
Condenser	Liebig 400 mm
Heater	Mantle 1000 ml, 450 W
Joints	Standard taper
Glass	Borosilicate
Stand	Rod and clamps
