

Product name:
Dynamics Trolley Plastic Pair

Product code:
CIVIL-FOC-114-0016

Description

Dynamics Trolley Plastic Pair

Technical specification

Coupled with their low profile and accurate mass of 600g, this allows a range of kinematic experiments to yield high quality data.

Made from rigid ABS plastic, these trolleys have accurately-aligned, very low friction wheels.

The two-position firing pins have a locking catch for safety and the trolleys have velcro pads for inelastic collision experiments.

The trolleys are stackable and can withstand loads up to 60kg.

Dimensions: 310mm (L) x 130mm (W) x 90mm (H).
