Product name:	Product code:
Refrigerated Clinical Centrifuge 4000 rpm	CMI-NP-0141

Description

A refrigerated clinical centrifuge with temperature control from minus 10 to 40 deg C for heat sensitive samples such as blood components and biological fluids.

Technical specification

Power supply	230 V AC, 50 Hz

Standard Accessories

- Rotor
- Buckets

The compressor cools the chamber while spinning, so enzymes, hormones and cells stay stable. It is used in research and hospital laboratories.

Features

- Temperature control down to minus 10 deg C
- Microprocessor speed and time control
- Swing out rotor
- Imbalance protection

Technical Specifications

Max speed	4000 rpm
Capacity	4 x 100 ml or 24 x 15 ml
Temperature	-10 to 40 deg C
Max RCF	Approx. 3000 x g
Timer	1 to 99 minutes
Control	Microprocessor
