Product name:	Product code:
Shaking Water Bath Incubator Digital	CMI-NP-0168

Description

A digital shaking water bath with reciprocating or orbital motion at set temperature, used for enzyme reactions, solubility studies and culture growth.

Technical specification

Standard Accessories

- Flask clamps
- Lid

Flasks stand in a heated water bath while shaking. The water bath ensures good heat transfer and uniform temperature.

Features

- Heated water bath
- Variable speed shaking
- Digital temperature control
- Stainless steel tank
