Product name:	Product code:
Laboratory Fluid Bed Dryer	CMI-NP-0178

Description

A small fluid bed dryer for drying granules and powders in suspended hot air, used for formulation development and teaching of pharmaceutical processing.

Technical specification

Power supply	230 V AC, 50 Hz

Standard Accessories

- Filter bags
- Product bowl

Air flows upward through a bowl of material, keeping the particles fluidised and drying them quickly. Batch size is small, suitable for laboratory use.
