Product name:	Product code:
Digital Plethysmometer for Paw Volume	CMI-NP-0183

Description

A digital plethysmometer measuring paw volume of rats by fluid displacement, used to evaluate anti-inflammatory drugs in carrageenan oedema studies.

Technical specification

Power supply	230 V AC, 50 Hz

Standard Accessories

- Measuring cell
- Wetting solution

The paw is dipped in a measuring cell and the displaced volume is shown on the display. Repeated readings show how swelling changes after drugs.
