Product name:	Product code:
Pipette Washer with Drying Cabinet	CMI-NP-0190

Description

A pipette washing tank combined with a hot air drying cabinet, so pipettes are rinsed and dried in the same unit before reuse in analytical laboratories.

Technical specification

Standard Accessories

- Pipette basket

After washing, warm air flows through the basket to dry pipettes. This prevents contamination and saves handling time.

Features

- Washing and drying in one unit
- Stainless steel drying chamber
- Thermostat controlled heater
- Pipette basket
