Product name:	Product code:
Reciprocating Flask Shaker Variable Stroke	CMI-NP-0210

Description

A reciprocating shaker with adjustable stroke and speed for flasks, separating funnels and bottles, used for extraction and dissolution tests.

Technical specification

Power supply	230 V AC, 50 Hz

Standard Accessories

- Flask clamps

The platform moves back and forth at set speed. Stroke adjustment allows gentle to vigorous shaking depending on the application.
