Product name:	Product code:
Six Place Soxhlet Extraction Apparatus with Mantles	CMI-NP-0214

Description

A six place Soxhlet extraction apparatus with heating mantles, extractors and condensers for fat and oil determination in food, feed and seed samples.

Technical specification

Power supply	230 V AC, 50 Hz

Standard Accessories

- Thimbles
- Glass beads

Each position has a glass extractor, flask and condenser on a common rack, and the solvent cycles through the thimble for hours. Individual regulators control heat.
