Product name:	Product code:
Manual Tissue Grinder Set	CMI-NP-0224

Description

A hand operated set of glass tubes and pestles used for homogenising small tissue samples and cell pellets. Used in school and college biology and biochemistry labs where no power is needed.

Technical specification

Operation	Manual
Autoclavable	Yes
Packing	Foam lined box

Standard Accessories

- Foam lined storage box

The set contains matched ground glass tubes and pestles. The sample is placed in the tube and ground by hand with twisting up and down strokes. It is a low cost option for small samples.
