

Product name:
Signal Generator and Amplifier 1hz to 100hz

Product code:
CIVIL-SUND-119-0008

Description

Signal Generator and Amplifier 1hz to 100hz

Technical specification

PULSE, TTL/CMOS Sine/Square/Triangular all the three outputs are available at a time on the front panel & can be used simultaneously.

The Function Generator has many versatile functions.

Wave Shape Output : Square, Sine, Triangular, Pulse & TTL/CMOS Compatible Square Wave Output Freq. Output : 1 Hz - 100KHz (adjustable) in five steps 1Hz, 10Hz, 100Hz, 1KHz, 10KHz with multiplier x 10 Coarse & Fine Amplitude control settings are provided at the front panel.

VCO (Voltage Controlled Oscillator) : In this mode the o/p frequency available is corresponding to the DC Voltage applied at the VCO IN (0.1V to 10V) socket & putting the toggle switch in external mode.

PULSE & TTL/CMOS output, amplitude in the fixed compatible to TTL/CMOS series

Input Voltage 120V, 60Hz & 240V, 50Hz/60Hz (Selectable)
