Product name:	Product code:
Digital Water Bath 6 Hole	CMI-NP-0232

Description

A six hole water bath with concentric ring covers for heating beakers and flasks of different sizes. Used in chemistry and pharmacy labs for safe heating of flammable liquids.

Technical specification

Hole diameter	Approx. 100 mm with rings
Control	Digital PID
Supply	230 V AC 50 Hz

Standard Accessories

- Set of concentric rings

Concentric rings allow vessels of many diameters to sit in the hot water. A digital controller maintains temperature. It is a common replacement for open flame heating.

Features

- Six hole top with concentric rings
- Digital PID temperature control
- Stainless steel tank
- Water level protection
- Safe heating of volatile liquids

Technical Specifications

Number of holes	6
Temperature range	Ambient +5 to 100 deg C
Accuracy	+/- 0.5 deg C
Tank material	SS 304
Heater	1.5 kW
