Product name:	Product code:
Automatic Water Distillation Plant 10 LPH	CMI-NP-0237

Description

A stainless steel automatic distillation plant producing 10 litres of distilled water per hour with level control and auto shut off. Used in colleges, hospitals and industrial labs.

Technical specification

Cooling water	Approx. 80 litres per hour
Conductivity	Less than 5 microsiemens per cm
Supply	415 V AC 3 phase 50 Hz

Standard Accessories

- Float valve
- Storage tank

Raw water feeds into a boiler automatically and distillate is stored in a tank. Float and thermal controls make the plant run without watching.

Features

NAUGRA®
