

Product name:
Microwave Transmitter/Receiver

Product code:
CIVIL-SUND-119-0015

Description

Microwave Transmitter/Receiver

Technical specification

Built in gain control for the receiver, with 30 bar graphs to indicate signal strength, external outputs to data-loggers and external meters. Apparatus for the investigation of transverse waves. Convenient wavelength for the investigation of transverse waves. Built in loudspeaker for the receiver, with on /off control. Detailed instruction booklet illustrating various microwave experiments, covering topics of wave reflection, refraction, polarization, interference etc. Auxilliary input for external simple tones to transmit through microwaves. Plane polarised wave for the transmitter, internally modulated with 1KHz tone, or music, or no modulation. Probe Detector for non-directional reception of the microwaves.
