Product name:	Product code:
Automatic Water Still With Storage Tank	CMI-NP-0242

Description

A still that fills its own boiler and stores distilled water in an attached tank with level control. Used in labs needing a steady supply without attention.

Technical specification

Conductivity	Less than 5 microsiemens per cm
Supply	230 V AC 50 Hz

Standard Accessories

- Tank tap
- Tubing set

Water level controls feed the boiler and stop heating when the tank is full. This saves water and supervision time.

Features

NAUGRA®
