NAUGRA®

Product name:	Product code:
Sectional Model of Three Phase Induction Motor	CMI-NP-0266

Description

A cutaway squirrel cage induction motor showing the stator, rotor, windings, bearings and shaft. Used in teaching electrical machines. Features include cut section showing stator and rotor, painted parts for easy identification and rugged mounting base.

Technical specification

Frame	Cast iron
Mount	Wooden or MS base
Cut	Half cut, sectional
Weight	Approx. 15 kg

Standard Accessories

- Part identification chart

A part of the casing is removed and painted for clarity so that students can see the internal construction. Key specifications include type of Squirrel cage induction motor and rating of 0.5 HP, 415 V.
