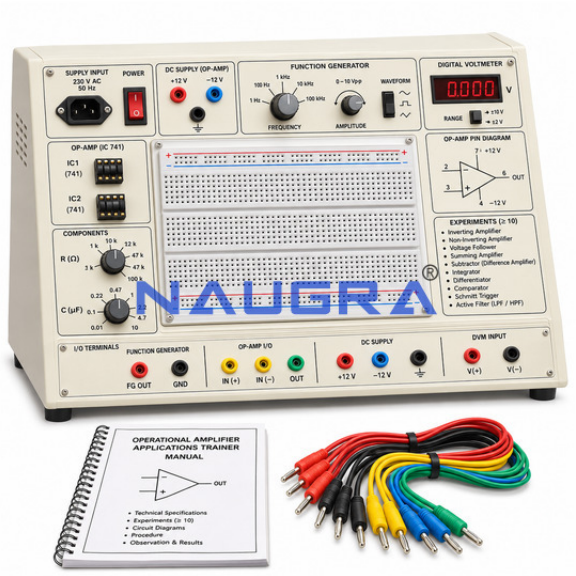
| Operational Amplifier Applications Trainer | CMI-NP-0271 |



## Description

A trainer for experiments on op amp circuits such as inverting, summing and integrating amplifiers. Used in electronics labs. Features include IC 741 op amps, patch field and dual power supply.

## Technical specification

| | |
|---|---|
| Supply input | 230 V AC 50 Hz |
| Experiments | 10 or more |

**Standard Accessories**

- Patch cords
- Manual

Plug in components and built in op amps allow quick setups. Power supplies are included.

**Features**

- IC 741 op amps
- Patch field
- Dual power supply
- Function generator
- Test points
