NAUGRA®

Product name:	Product code:
Load Test on Three Phase Induction Motor Panel	CMI-NP-0274

Description

A panel with motor, brake and meters for conducting load tests on a three phase induction motor. Used in electrical machines labs. Features include starter with protection, wattmeters and ammeters and brake load.

Technical specification

Starter	DOL
Supply	415 V AC 3 phase 50 Hz
Experiment	Load characteristics

Standard Accessories

- Patch cords
- Manual

The motor is loaded by a rope brake or generator while readings are taken. The panel gives full performance characteristics.

Features

- Stand with pulley
- Wattmeters and ammeters
- Brake load
- Speed measurement
- Safe terminals

Technical Specifications

Motor	3 phase, 1 HP, 415 V, 1440 rpm
Wattmeter	Two wattmeters
Voltmeter	0 to 500 V
Ammeter	0 to 5 A
Loading	Rope brake
