NAUGRA®

Product name:	**Product code:**
Swinburne Test on DC Machine Panel	CMI-NP-0277

Description

A panel for Swinburne's no load test to determine DC motor losses and efficiency. Features include starter and rheostats, meters for voltage and current and speed indicator.

Technical specification

Supply	230 V DC or rectified
Experiment	Swinburne test

Standard Accessories

- Patch cords
- Manual

The motor runs on no load and its input current and speed are recorded. Efficiency is then calculated at various loads.

Features

- Starter and rheostats
- Meters for voltage and current
- Speed indicator
- Motor included
- Protection

Technical Specifications

Motor	DC shunt, 1.5 kW, 220 V
Starter	3 point
Rheostat	Field and armature
Voltmeter	0 to 300 V
Ammeters	Two
Speed	Tachometer
