

**Product name:**  
Hand Operated Newton Color Disk

**Product code:**  
CIVIL-OPT-113-0018

### Description

Hand Operated Newton Color Disk

### Technical specification

For demonstrating that white light is composed of all the spectral colors through the additive maxing of the colors. Comprising a multi-colored circular disc having sectors of various spectral color in proper proportions. When rotating the disc at sufficient speed, all the colors will be observed to disappear by merging into a single white color. The disc has a friction pulley at the back touching the driving wheel with a handle. Complete assembly mounted on a stable base.
