

Product name:
Electric Newtons Color Disc

Product code:
CIVIL-OPT-113-0019

Description

Electric Newtons Color Disc

Technical specification

For demonstrating that white light is composed of all the spectral colors through the additive maxing of the colors. Comprising a multi-colored circular disc having sectors of various spectral color in proper proportions. When rotating the Electric Newton's Color Disc at sufficient speed, all the colors will be observed to disappear by merging into a single white color. The disc has a friction pulley at the back touching the driving wheel with a handle. Complete assembly mounted on a stable base.
