

Product name:
Plancks Constant Measuring Instrument

Product code:
CIVIL-OPT-113-0026

Description

Plancks Constant Measuring Instrument

Technical specification

Plancks Constant Measuring Instrument can carry on the experiment about the rule of photoelectric effect, and calculate Planck's constant according to Einstein's equation of photoelectric effect.

Satisfying the students' grouping experiments, the instrument has features such as compact structure, fastness, convenient operating, steady performance, cheap and convenient service etc.

The anode of phototube is not shined directly, so the reverse current is small.
