Product name:	Product code:
Three Roll Plate Bending Machine Hydraulic	CMI-NP-0350

Description

A hydraulic plate roll that bends heavier plate with a hydraulic cylinder. Used in fabrication and boiler workshops. Features include hydraulic roll adjustment, hardened rolls and control panel.

Technical specification

Speed	Approx. 5 rpm
Weight	Approx. 2500 kg

Standard Accessories

- Foot pedal
- Tool kit

The side rolls are lifted hydraulically to bend thick plate. The unit gives smoother action than manual units.

Features

- Hydraulic roll adjustment
- Hardened rolls
- Control panel
- Overload valve
- Heavy frame
