| Semi Automatic Hollow Block Machine With Vibrator | CMI-NP-0495 |

## Description

Semi automatic block machine with vibrator and mould lift for hollow blocks. Used for lab scale block production with consistent quality. Main ratings: block size 400 x 200 x 150 mm, output 400 blocks per hour, motor 5 HP, 415 V AC.

## Technical specification

| | |
|---|---|
| Mould lift | Mechanical |
| Pallet | 400 x 450 mm |
| Weight approx. | 1100 kg |

**Standard Accessories**

- Operating manual
- Set of basic tools

Semi Automatic Hollow Block Machine With Vibrator is built for engineering colleges, polytechnics, ITIs and technical training workshops. Semi automatic block machine with vibrator and mould lift for hollow blocks.
