Product name:	Product code:
Modular Flexible Manufacturing System Trainer	CIVIL-MFS-153-0001

Description

Modular Flexible Manufacturing System Trainer

Technical specification

The modular flexible manufacturing system trainer contains five work units, which are distribution station, detection station, processing station, handling station, and classified storage station.
The five stations are all mounted on the industrial profile table. The detection mechanism, control mechanism, and actuating mechanism are independent.

Components of this training equipment include:
Switching power supply, buttons, cylinder, swing-cylinder solenoid valve, vacuum generator, DC gear motor, various commonly used industrial sensors, a variety of commonly used detection switches, I/O adapter plate, communication interface board, etc.
