NAUGRA®

Product name:	Product code:
MIG Welding Machine Inverter Type	CMI-NP-0676

Description

MIG Welding Machine Inverter Type is an inverter-based MIG/MAG welding machine with wire feeder and gas control, designed for gas metal arc welding of mild steel and stainless steel in training workshops.

Technical specification

Weight	approx. 30 kg

The MIG Welding Machine Inverter Type is an inverter-based MIG/MAG welding machine with wire feeder and gas control. It is built for gas metal arc welding of mild steel and stainless steel in training workshops.

Features

NAUGRA®
Civil Laboratory Equipment Manufacturers and Suppliers India Civil Lab Exportrs India
Email us at: export@civilmechanicalindia.com

- Inverter technology for stable arc
- Built-in wire feeder
- Adjustable voltage and wire speed
- Thermal overload protection

Technical Specifications

Input	415 V AC, 3 phase, 50 Hz
Welding current	30 to 250 A
Duty cycle	60 percent at 250 A
Wire diameter	0.8 to 1.2 mm
Cooling	Fan cooled
Protection	IP21
