

Product name:
Optical Lens Set

Product code:
CIVIL-OPT-113-0041

Description

Optical Lens Set

Technical specification

Science education products incorporate applied math and science principles into classroom and homeschool-based projects. teachers in pre-k, elementary, and secondary classrooms use science education kits and products alongside science, technology, engineering, and math (stem) curriculum to demonstrate stem concepts and real-world applications through hands-on activities. science education projects include a broad range of activities, such as practical experiments in engineering, aeronautics, robotics, energy, chemistry, physics, biology, and geology.
