NAUGRA®

Product name:	Product code:
ARM Peripheral Interface Training Kit	CMI-NP-0976

Description

A peripheral interfacing kit for ARM controllers with keypad, seven segment, DAC, relay and sensor modules for motion control and automation experiments.

Technical specification

DAC	8 bit
Sensors	Temperature, IR, LDR
Motor driver	H bridge, 1 A
Connection	Ribbon cable and headers
Power supply	230 V AC, 50 Hz

Standard Accessories

- Ribbon cables
- Software CD

Plug in modules connect to the ARM board and let students build complete control systems such as motor drives and sensing circuits.

Features

- Interface modules for ARM boards
- Keypad, relay, seven segment and DAC
- Temperature and IR sensor modules
- Motor driver module
- Header based connections
- Programs on CD

Technical Specifications

Modules	12 types
Keypad	4 x 4 matrix
Display	4 digit seven segment, LCD
Relay	2 channel, 5 V
