NAUGRA®

Product name:	Product code:
Three Phase Induction Motor Control Training Panel	CMI-NP-0984

Description

A training panel for starting and controlling three phase induction motors with DOL, star delta and reversing circuits, used in electrical technology courses.

Technical specification

Protection	MCB
Supply	415 V AC 3 phase
Panel	Powder coated steel
Experiments	DOL, star delta, reversing
Power supply	230 V AC, 50 Hz

It carries contactors, overload relays, timers and push buttons on a safe wiring panel. Students wire power and control circuits and run a small motor.

Features

- Contactors, overload relay and timers
- DOL, star delta and forward reverse circuits
- Push buttons and indicator lamps
- 4 mm safety sockets
- Included 3 phase motor
- MCB protection

Technical Specifications

Motor	0.37 kW three phase induction
Contactors	3 nos, 9 A
Overload relay	1 to 1.6 A
Timer	On delay, 0 to 30 s
